

Blast Protection and Physical Security

GlassLock's ForceDefender™ BlastBlinds™ (Patent Pending) offers a wide variety of options for retrofit solutions for buildings of architectural or historical significance.

BlastBlinds™
meet ISC/GSA
Performance Criteria
Level 3
Blast Test Reports
available

BlastBlinds™:

This product is for retrofit/renovation for existing buildings that currently have any type of window blinds or treatment, do not want to alter

Glass Failure, Glass Hazard

the architectural sight lines and require significant blast hazard mitigation. The projected installed cost will be about 50-60% less expensive than blast windows. The blinds can be made to look like any standard window blind product or vintage Venetian type blind for buildings that have a historical significance.

BlastBlinds™:

- Operable or removable
- Fits any window
- Works as solar blinds
- Maintains historic appearance
- Reduces overall cost in most instances
